

IR850-IR940 Solstice Solo
Compact for Universal Applications

Original Light Bar With Seamless Beam

INFRARED MODELS

10 Watt Infrared LED Lights are Available in 850 and 940 Nanometers Infrared LED's enhance night vision capabilities for military personnel, and for infrared vehicle lighting, security lighting applications, and other covert general area infrared lighting. Vision X infrared lighting has been trusted by only the best like the U.S. Border Patrol, the Department of Defense, and the U.S. Military.

Solstice Solo Infrared Series Usage Guide

10 Watt Infrared LED

IR850

The IR850 is slightly detectable to the naked eye with a reddish glow when the LED's are activated. The LED only emits a red light one to two inches. The IR850 holds the advantage of illuminating brighter than the IR940. If night vision illumination is your top priority than the IR850 LED will be the best available option.

IR940

The IR940 is virtually invisible to the human eye while activated with a very faint purplish glow. The IR940 LED emits virtually no light. The IR940 is the ultimate infrared LED light when stealth is of the utmost importance. Application is the deciding factor in which IR light you chose, and which is more important, stealth or illumination.
