

Vortex LED Headlight

LED Headlight Replacement

3 DIFFERENT MODES

Equipped with a Halo LED Ring, the Vortex LED Headlight also comes packed with an extremely powerful high beam, and a wide spread low beam. With such diversity in beam pattern, you can rest assured that you'll have to right lighting for the right scenario at any given time.

LED HALO RING

The Vortex LED Headlight features a bright halo ring that can be active without having the low beam or high beams on. Having a 7" halo on the front of your vehicle will not only turn heads, but also provide you with the optimal lighting options for the right conditions.

Universal Applications

The 7" Vortex was designed to be used by any vehicle that currently has a 7" Factory Headlight, or has a custom fit 7" mounting area. Jeeps, Classic Cars, and Motorcycles were all kept in mind while the Vortex was engineered, making it the perfect light for those applications.

E-MARK And ADR Models Available

One of the toughest challenges when engineering a vehicle light for a global market is dealing with so many different regulations and laws from all over the globe. Vision X wanted to make sure that any customer, no matter where they're located, can enjoy their top-of-the-line LED Headlights worry free.
